*This case included a Robinson hearing against the experts on the Hutchison side of the matter. This motion failed to quash any of our experts' testimony whereas a counter Robinson motion was successful against several experts from the other side.

**This case included (3/31/2003) a Robinson style Motion to Quash Testimony regarding a Two Week Span from the Date Of Loss to the Investigation and a Rekindle by the Defense (Scott Cummings) before Judge Evans and D. R. Horton (our client's side and my testimonial acceptability prevailed).

***A Robinson/Daubert style challenge to the admissibility of the evidence was presented to the court in this matter and we prevailed in the admissibility of all evidentiary items.

****Testimony involving peer review of Investigator Richard Downing's O&C Investigation
